

# Get Outside and Build Your Pals Their Own Paddock!

## Let's Play Tricks With Sticks!

1

Start by gathering up all kinds of branches, all about the same width.

Get a **pruning shears**, a **ruler**, and a **grownup** to help.

With your grownup, measure and cut **six Y-sticks**, with the bottom tips cut to points.

Next, find **five straight sticks**, and cut them to **11" long**, plus **one endearingly fanciful stick** for the gate. If you can't find a fanciful stick, a straight stick will make a wonderful gate too!!

 You'll need a grownup to help with this activity!

2

Put your Pal or Pals in the middle of where you want your Paddock to be. Now it's time to shape it up. We made a paddock in a **6-sided hexagon\*** shape!

With your ruler as a guide, push two Y sticks into the ground, **10" apart**, with the Y-parts pointing up.

Continue to place Y-sticks 10" apart until you form a hexagon shape.

\*This shape is a hexagon; it has six sides.

3

Now, **connect two Y-sticks with a straight stick**. Continue connecting Y-sticks with the remaining sticks until you form a hexagon paddock.

4

Use an endearingly fanciful stick to build a glorious gateway!

HOME SWEET PADDOCK!!

LET'S PLAY!
